S.M.A.R.T. Goal: Get Better Grades at School

Goal: To prevent getting thrown off the basketball team, I need to boost my marks in chemistry and math before next semester by retaking my most recent exams within a month, preparing for an hour each day, and completing after-school sessions twice a week.

Specific: Avoid being dismissed from the team by concentrating on your academics and making an effort to raise your marks.

Measurable: This objective can be monitored on a monthly basis with the aim of finishing it before the upcoming semester.

Attainable: This is an attainable objective if time is dedicated to studying or completing after-school activities rather than engaging in individual pastimes. When retaking the exam, preparation will assist. Maintaining good grades will keep you on the team.

Relevant: Increasing GPA will enable the continuation of basketball, which is important for the career and activity to advance in school.

Time-Bound: By the end of the next semester, this objective should be achieved.
